Due in DC at half past 11. Could go directly to site or go to hotel. At JW Marriott on Penn x from Willard. Have central DC appt at 3.
You tell me what works best for you. I assume they have Inet connection. Damn. Should have washed hair this am!

Would you be able to do an interview from dc
400 north capital or 2020 m street?

Press attention will force a public hearing especially after the snow debacle
Can you get to a computer?
How do I reach normand and lois
Do you have the video from you study as well as the numbers?

If I can get to a computer I have file you want in my Drop box. Unfortunately decided not to bring my laptop this trip. Will call when I get there.

Lois Carswell and Norman both good.

Thanks for your continued support in the fight against this design for the lane. Park solution superior but DOT will not give it a hearing. Think they don't want to look soft.

Please call me when you get to dc

Is there any way you can get me the study neighbors for better bike lanes has done?

Will you do a telephone interview with me?

Is there anyone else from your group who will go on camera.. to talk about the study. Norman steisel? Someone else?

I am on the train to DC and back tomorrow. Do not want to speak from the train. Due in DC about 11 and have an early afternoon appointment. Does it help to call on my arrival in DC? I know you have tight deadlines.

Just tried hotel business center and they won't let me install Dropbox either. I could send a sample of a clip on Sunday but suspect that will not help for this story. We will be developing other things hopefully of interest as we work on trying to understand the data and will call you first on anything good. I am really sorry about this but no way out. Have to go to appt now. Thanks for your interest in this story. I think they are flimflaming us but we need better grounding before we can say that publicly. That DOT says they do not know about these NYS data coming from NYPD is hard to understand. Even TrafficAlternatives uses them for their CrashStat site though they only report pedestrian and bike accidents with cars, not car-car.

This is all I have available, unfortunately. The last one is a response to some pro-bike bloggers. Hope this helps.
